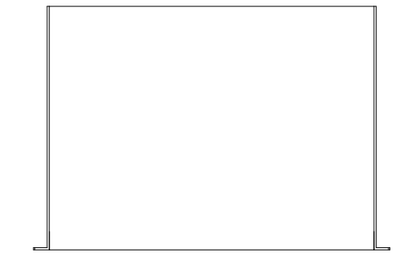
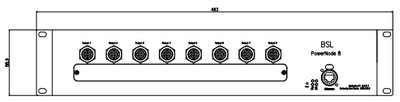
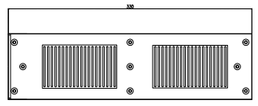
Power/Data Supplies

One System Integrated with Art-Net Node and Power Supply

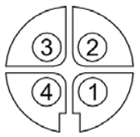
Titan A8 Pro







4pin Connector Layout



4-GND
1-24V
3-DMX+
2-DMX-

Accessories

- Colordreamer Titan Pro Series is one system integrated with artnet controller and power supply together. Each 4Pin port can provide DMX signal and power together to led fixtures.
- Colordreamer Titan Pro converts Art-Net data from Ethernet network to DMX512.
- Perfect synchronization between each universe.
- Colordreamer Titan offers powerful features, especially in combination with Colordreamer software.
- Power/artnet supplies take full advantage of pixel mapping and voxel mapping, easy to install.
- The power/artnet supplies is ready within seconds after start-up. An HTP merge is automatically available for two Art-Net sources. If required, you can access and change specific device settings using the built-in web configuration tool.

1200W Output
Standard 2U Size

Titan A8 Pro

Electrical

Input voltage	100-240VAC
Output Power	1200W

Control

Input Protocol	ARTNET
Output Protocol	DMX512
Refresh Rate	40Fps
Default IP	192.168.1.100
Default Subnet	255.255.255.0
DMX Channels	8*512 Channels

Connection

Ethernet Port	RJ45
DMX512 Ports	4Pin Female

Environment

Operating Temperature	-30° to 60°		
Startup Temperature	-30° to 60°	IP	Indoor,IP20
Storage Temperature	-40° to 80°		

Certificate

CE RoHS
